

I claim:

1. A truck comprising:

a frame with a locking pin; and

a bed located on said frame, said bed comprising:

a front bed portion;

a rear bed portion;

a hinge connecting said front bed portion and said rear bed portion, wherein each of said front bed portion and said rear bed portion arches upward toward said hinge, so that said bed has a continuous convex curve shape over said frame; and

a post assembly with a notch for fitting around said locking pin so as to lock said rear bed portion in a travel position.

2. A truck comprising:

a frame with a locking pin; and

a bed located on said frame, said bed comprising:

a front bed portion;

a rear bed portion;

a hinge connecting said front bed portion and said rear bed portion, wherein each of said front bed portion and said rear bed portion arches upward toward said hinge, so that said bed has a continuous convex curve shape over said frame; and

a dock lock with notches for fitting one of said notches around said locking pin so as to lock said rear bed portion is an elevated position for coupling with a truck dock.
